

## Town Specific Tourist Parking Permit

Your vehicle is only permitted to park with this permit within a designated pay and display parking bay that is situated within the area specified on the front of your permit.

For example, if your permit states that it is valid for parking within Ryde, you may only use it to park within the locations listed under Ryde from this sheet.

The permit is not valid in any of the other locations listed on the sheet and any Penalty Charge notices issued for parking in the wrong location will not be cancelled.
